Forecast for Saturday 21 Jan 2023

Weather: Mostly dry overnight with cloud thickening towards dawn when some mist and fog will form with light and patchy rain affecting ranges west of the A9. Eastern ranges will stay mostly dry with a slight risk of patchy drizzle at times.

Chance of cloud-free hill tops above 800m: 30% in the west, 50% in the east. Broken low cloud at times around western summits, hills further northeast seeing the best conditions.

Low cloud and visibility: Broken low cloud above 400m will develop across ranges west of the A9, cloud to the north and east will be scattered above 600m. The visibility will be poor at times in the west with moderate or good visibility elsewhere.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

In spite of rising freezing levels, gale to severe gale force winds will keep the wind chill severe and navigation will prove difficult, particularly in periods in reduced visibility in mist, rain or drizzle.

Forecast for Sunday 22 Jan 2023

Weather: Cloudy with mist and fog together with further outbreaks of light rain and drizzle across western ranges, drier and brighter conditions to the north-east. Gradual thaw of snow.

Maximum wind: Southwest 25-25mph gust 45mph.

Chance of cloud-free hill tops above 800m: 30% in the west, 60% in the north and the east.

Low cloud and visibility: Broken low cloud above 300m will develop across western ranges, cloud to the north and east will be scattered above 500m. The visibility will be poor at times in the west with moderate or good visibility elsewhere.

Temperature: **Glens:** Minus 4 Celsius rising plus 6 Celsius.
At 800m: Plus 3-4 Celsius.
Freezing level: Above summits.
